

# WENEBRIK

BRITISH MADE

In this book of instructions there are illustrations of 70 different models that can be built with Wenebrik. You will find it extremely fascinating designing a new model, as hundreds more may be built. Wenebrik is the most popular building toy for girls. There are no tools, no small parts to lose, and nothing to puzzle the youngest child.

**This is a street  
in a WENEBRIK village**

Wenebrik models are real buildings in miniature, embodying correct scale construction with perfect colour effects. Each outfit contains a number of Bricks, Ridge Tiles, Slates, Cornice Doors and Frames. (Chimneys and Gutters are included in the larger outfits).

SOLE MANUFACTURERS: WILLIAM BAILEY (BIRMINGHAM), LTD., BIRMINGHAM, ENGLAND

(PRONOUNCED AS "WEENY BRICK.")

The No. 0 set of Wenebrik will build the first ten models shown in this manual, the No. 1 the first thirty, the No. 2 the first forty, the No. 3 the first fifty, the No. 4 the first sixty, and the No. 5 will build all of the seventy; and in addition, each set can be used to make miniatures of other buildings not shown in the manual. The units in every set are the same, and two sets can be used together for building larger models. To complete the appearance of the houses, small pieces of lace can be fixed inside the windows.

## INSTRUCTIONS.

Before beginning to build a model, thoroughly examine the list of the Wenebrik parts on pages 3 and 4: you will then be able to select the pieces required for each model. Then carefully study the drawings on pages 5 and 6, which will make quite plain the right way to build.

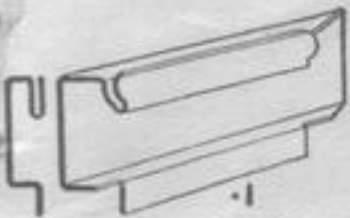

Drawing A shows how the tongues of the bricks fit into the grooves of the bases, and how the tongues of the second row of bricks fit into the grooves of the first row. Drawings B and E are marked with the numbers of the pieces used, and show how the parts all fit nicely together and also make quite clear how to fix the windows and doors.

Always endeavour to make each brick fit half over each of the two below and then the one above will keep the two below in place.

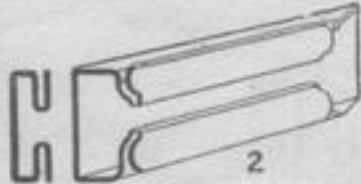

Drawing D shows how to make the roof and Drawing C how to make the cornice pieces keep in place, on which the roof rests.

Double size illustration of a section showing the principle of construction.

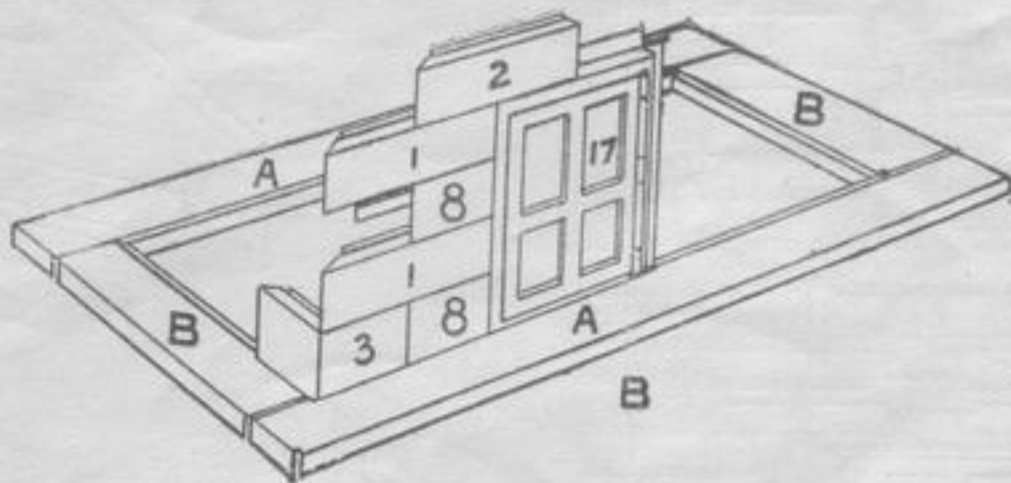

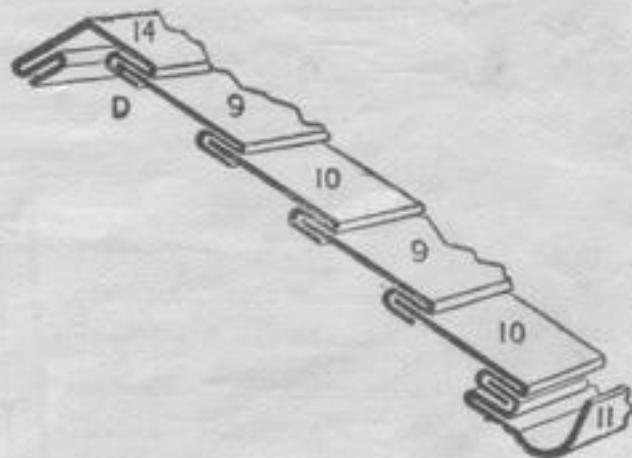

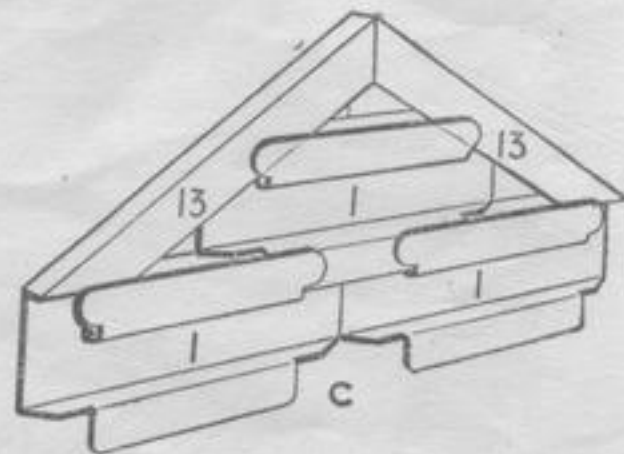

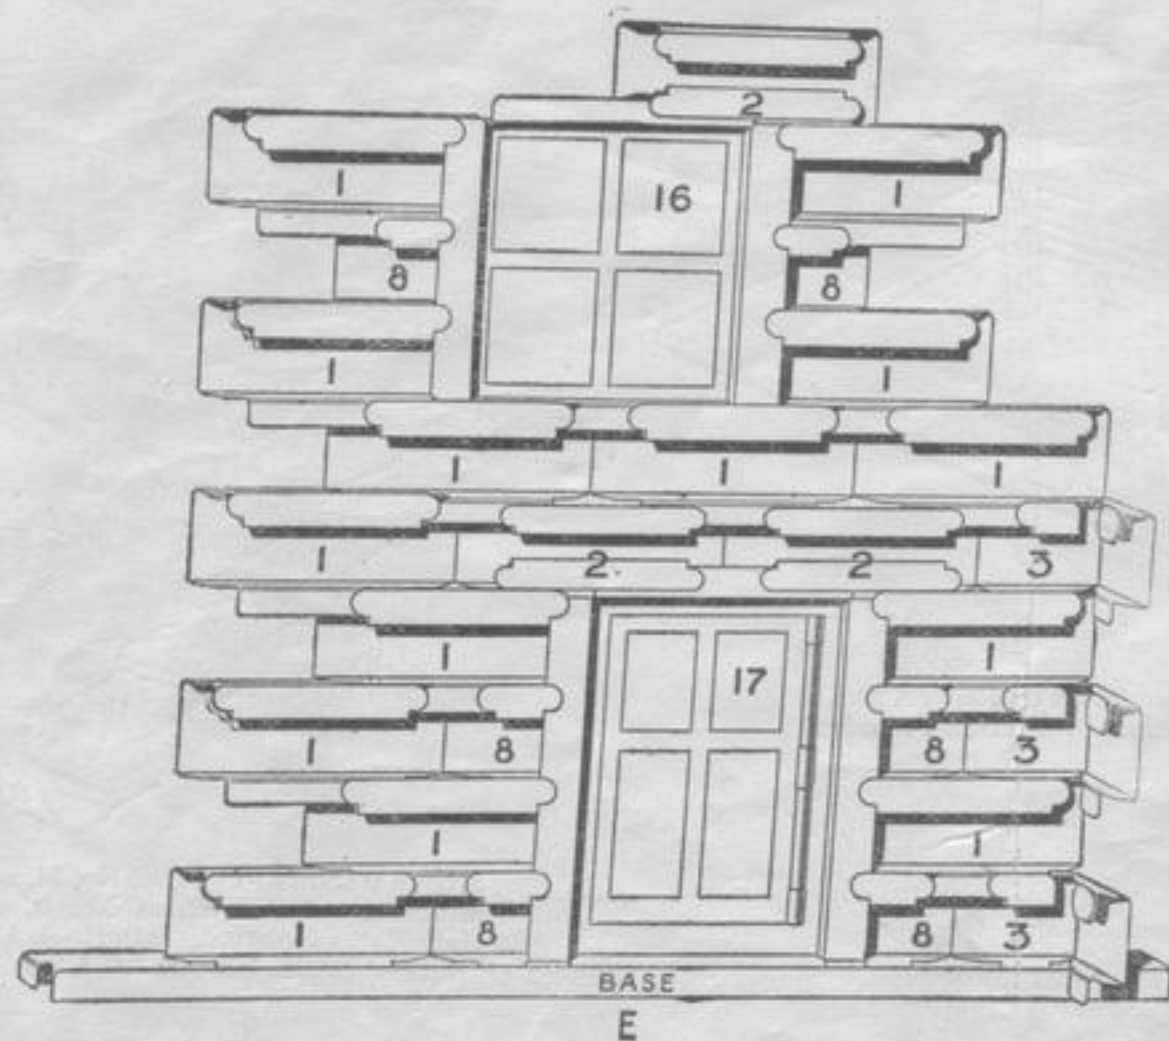

Illustration B shows the foundation on Bases A and B, with other parts in position to continue building.

Section D shows Ridge Tile No. 14, with alternate rows of Slates No. 9, and Half Slates No. 10. Gutter No. 11 is attached to the last row of slates
